Description :

Prsentation de l'diteurImportant study focuses on the revival and assimilation of ancient Greek mathematics in the 13th16th centuries, via Arabic science, and the 16th-century development of symbolic algebra. This brought about the crucial change in the concept of number that made possible modern science. Includes a translation of Vieta's Introduction to the Analytical Art. 1968 edition. Bibliography.Prsentation de l'diteurImportant study focuses on the revival and assimilation of ancient Greek mathematics in the 13th16th

centuries, via Arabic science, and the 16th-century development of symbolic algebra. This brought about the crucial change in the concept of number that made possible modern science. Includes a translation of Vieta's Introduction to the Analytical Art. 1968 edition. Bibliography.
