## Description :

Prsentation de l'diteurJavaScript is the programming language of the Internet, the secret sauce that makes the

Web awesome, your favorite sites interactive, and online games fun!JavaScript for Kids is a lighthearted introduction that teaches programming essentials through patient, step-by-step examples paired with funny illustrations. Youll begin with the basics, like working with strings, arrays, and loops, and then move on to more advanced topics, like building interactivity with jQuery and drawing graphics with Canvas.Along the way, youll write games such as Find the Buried Treasure, Hangman, and Snake. Youll also learn how to:Create functions to organize and reuse your codeWrite and modify HTML to create dynamic web pagesUse the DOM and jQuery to make your web pages react to user inputUse the Canvas element to draw and animate graphicsProgram real user-controlled games with collision detection and score keepingWith visual examples like bouncing balls, animated bees, and racing cars, you can really see what youre

programming. Each chapter builds on the last, and programming challenges at the end of each chapter will stretch your brain and inspire your own amazing programs. Make something cool with JavaScript today! Ages 10+ (and their parents!)

**Presentation de l'auteur** JavaScript is the programming language of the Internet, the secret sauce that makes the Web awesome, your favorite sites interactive, and online games fun! JavaScript for Kids is a lighthearted introduction that teaches programming essentials through patient, step-by-step examples paired with funny illustrations. You'll begin with the basics, like working with strings, arrays, and loops, and then move on to more advanced topics, like building interactivity with jQuery and drawing graphics with Canvas. Along the way, you'll write games such as Find the Buried Treasure, Hangman, and Snake. You'll also learn how to:

- Create functions to organize and reuse your code
- Write and modify HTML to create dynamic web pages
- Use the DOM and jQuery to make your web pages react to user input
- Use the Canvas element to draw and animate graphics
- Program real user-controlled games with collision detection and score keeping

With visual examples like bouncing balls, animated bees, and racing cars, you can really see what you're programming. Each chapter builds on the last, and programming challenges at the end of each chapter will stretch your brain and inspire your own amazing programs. Make something cool with JavaScript today! Ages 10+ (and their parents!)

**Biographie de l'auteur** Nick Morgan is a British front-end engineer at Twitter. He loves all programming languages but has a particular soft spot for JavaScript. Nick lives in San Francisco (the foggy part) with his girlfriend and their fluffy dog, Pancake. He occasionally blogs at [skilldrick.co.uk](http://skilldrick.co.uk).
